Positive: Responsiveness

Everyone we dealt with was great. They did a professional job after we have a leak in our roof that dripped down into our house causing mold and water damage. Revive Water Damage Restoration Boca Raton had to rip out cabinets, carpet, other flooring, drywall and a ton of other stuff. They were very considerate and friendly when they were here. The work that was done was top quality. When they were finished everything looked amazing.

My house had a significant mold issue, so we called Revive Water Damage Restoration to assist with the remediation. We highly recommend them in Boca Raton. The owner and his team was incredibly knowledgeable and they took great care in their work. Our home no longer has mold. If we ever get a reoccurring mold issue we will call them right back to remove the mold. There is no point to shop around for price or to take a gamble on a 'possibly' better company a they are already amazing as is.

Positive: Professionalism, Punctuality, Responsiveness

During a bathroom remodel, I discovered mold behind the bathtub and shower, so I called Revive Boca Raton to do the remediation. The job was done quickly, and I was able to get back to remodeling quite fast. Luckily it was just mold and not water damage.

Positive: Quality, Value

Going through restoration and reconstruction after a water leak was very stressful for us. We were very happy with Revive Water Damage Restoration of Boca Raton who took over our reconstruction project and worked with us. The work got completed in a very timely manner and they made sure that we were happy and satisfied with the results. The work was flawless. It all looks so nice. But what I really love about them is that they know how to deal with people. I was literally crying when I called as we had water everywhere and things in our home that were in the family for 30+ years had been ruined. And they just knew how to deal with us. They were very kind and considerate. They just know how to deal with people who are going through a crisis and that alone makes them the best.

Positive: Quality, Value

The technicians from Revive Water Damage Restoration were very professional and did a great job! Our dishwasher leaked and caused water damage around our kitchen as we have carpet that runs off the tiles. They were quick to respond, they showed up in about 45 minutes when we called. They also left a dehumidifier running for a few days to really get everything dried out after we asked them to as we knew the insurance would ask about it as we had a water damage issue at our last place also with a washing machine. And then we found out that we jumped the gun and they were going to do this anyhow so they really know what they are doing. This Boca Raton local is easy to deal with, very thorough, and worked great with our insurance company. They even called them to clarify a few things and sent them extra documents when they asked. They really made us feel like we were being looked after.
